## Projects

Portfolio Site - [joshuacoyne.github.io](http://joshuacoyne.github.io)

[www.quilly.io](http://www.quilly.io)

Quilly is a Web App that allows a user to manage their job search by tracking each step of the application process. Quilly has an interactive, user friendly front-end built with React and a durable back-end that utilizes Node.js, express, and MongoDB.

Forget Me Knot - [forgetmeknot.netlify.com](http://forgetmeknot.netlify.com)

Forget me knot is a fully responsive notes application that allows a user to create, store and search notes for themselves. It is written with React, Node.js, express and MongoDB.

## Experience

W.A.M.M. · **Production Manager**

Aug. 2014 to May 2017

Davenport CA

- Lead a team of six people and was responsible for all tasks related to production of medical marijuana, including developing and executing a grow plan, sourcing and acquiring all supplies and equipment, and interfacing with other departments.
- Responsible for trouble shooting a wide array of issues as they arose, often by implementing creative and unique solutions.
- As a result of growing demand, I was tasked with hiring and building out a wholly new processing department to handle advanced processing techniques as well as long term organization, inventory keeping, and storage solutions.
- Developed the standard operating procedures for this department and oversaw their implementation.
- Responsible for giving updates at monthly board meetings.

Pacific Pulmonary Services · **Patient Care Coordinator**

Aug. 2013 to Feb. 2014

Watsonville, CA

- Responsible for growing my territory into a successful business by identifying potential referral sources and then developing a strategy to market my services to them.
- Once accounts were established I would maintain and grow these accounts by providing exemplary customer service and by offering new products and services.

Pulmonary Solutions ·

Oct. 2011 to July 2013

**Equipment Specialist & Outside Sales Rep**

Capitola CA

- Responsible for the training, education and support of patients who are beginning treatment with CPAP, BI-PAP and supplemental oxygen therapies.
- I would troubleshoot and remedy technical problems as they arose with the equipment.

Riverside Lighting · **Purchasing and Sales**

Nov. 2008 to Oct. 2011

Santa Cruz CA

- Residential and Commercial Lighting Sales from design through quotes, payment, delivery and follow up.
- Helped asses and remedy technical problems by recommending products and services designed to address a customers issues.

## Education

Lambda School

Feb. 2018 to Aug. 2018

Lambda School is a six month fully immersive Computer Science and Engineering Academy that provides a hands-on curriculum with a focus on full stack development and solving real world problems. At Lambda School I learned a wide variety of languages and frameworks, not only through classroom time, but also through daily hands-on projects that rigorously tested and expanded my understanding of the material. I utilized agile software development and Git workflow on all projects and gained hands-on experience with client and server testing. I also gained extensive experience collaborating with other developers to solve complex problems.
